RESEARCH INTERESTS

Dr Fabio Pierazzi is a Lecturer (Assistant Professor) in Cybersecurity at King's College London, where is also a member of the Cybersecurity group (CYS) and Programme Leader of the MSc in Cyber Security to ensure its quality and relevance. He closely collaborates with the Systems Security Research Lab (S2Lab) at UCL. He has a strong track record of AI & security publications in peer-reviewed venues, including top journals and top conferences in the field (e.g., USENIX Security, IEEE S&P, IEEE TIFS, IEEE TDSC), and also serves in Program Committees of well-known venues including IEEE S&P (Oakland), USENIX Security, AAAI, IJCAI, ICML, ICLR, DLS, AISec, DIMVA, and ARES, plus served as journal reviewer in multiple occasions for IEEE TIFS and ACM TOPS among others. He has worked on cybersecurity since 2011, when he started his MSc thesis in applied cryptography for cloud database security. During his Ph.D. (2014–2017), he then focused on statistical methods for the detection of advanced attackers in large networks. Fabio's research interests now focus on behavioral modeling for anomaly detection, with particular emphasis on: machine learning for systems security (mostly malware analysis and network intrusion detection), adversarial machine learning, and adaptive attackers in highly non-stationary contexts. Moreover, Fabio has delivered many teaching and mentoring activities in security in different countries (mostly UK and Italy). Fabio has also taken the leadership in the application for NCSC Certification of King's MSc in Cyber Security, which in March/April 2021 resulted in a successful outcome.
